

DTECT

Alan, Carl, Or, Rutwa & Xi

THE TEAM

CARL

Quality Assurance Analyst
at Eloqua, Oracle Canada

RUTWA

Business analyst at Government
of Canada

ALAN

Software developer at Ritual
Technologies

OR

Network engineer and full stack
developer in communication and
network industry

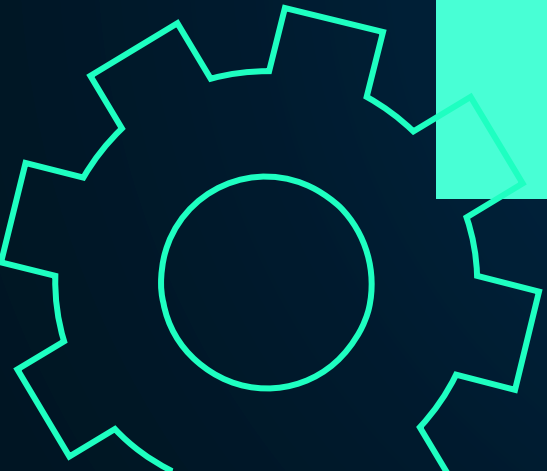

XI

Research assistant at Hospital for
SickKids and Vector Institute

The Problem

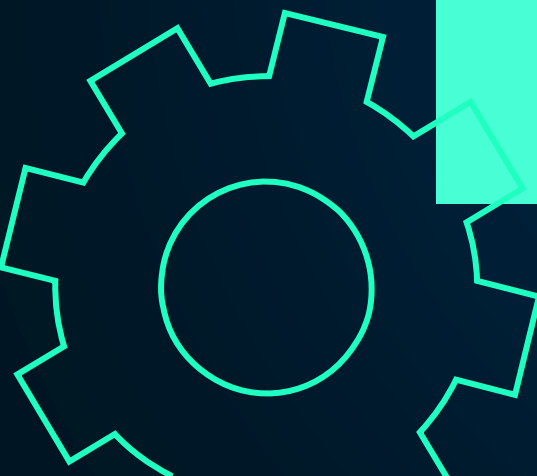

Insider threat is a
cybersecurity threat that
originates from someone
within the company

The Problem

Organizations continue to try to recognize and prevent insider threats. However, there is no one-size fit solution for insider threat and not all organizations have the infrastructure to support a solution

Vision

Find a solution that covers major insider threats

Provide a flexible, proactive solution that fits many organizations

Find mitigation strategies that will protect sensitive data

OUR SOLUTION

CATEGORIZATION OF LOG DATA

ACTIVITY LOGS VISUALIZATION

DATA SELECTION FOR ANALYSIS

MODEL FOR THREAT DETECTION

MARKET SEGMENTATION

INDUSTRY

Insider threats are hard to recover for industries that work with sensitive data

EMPLOYEE COUNT

Larger organizations are vulnerable to insider threat

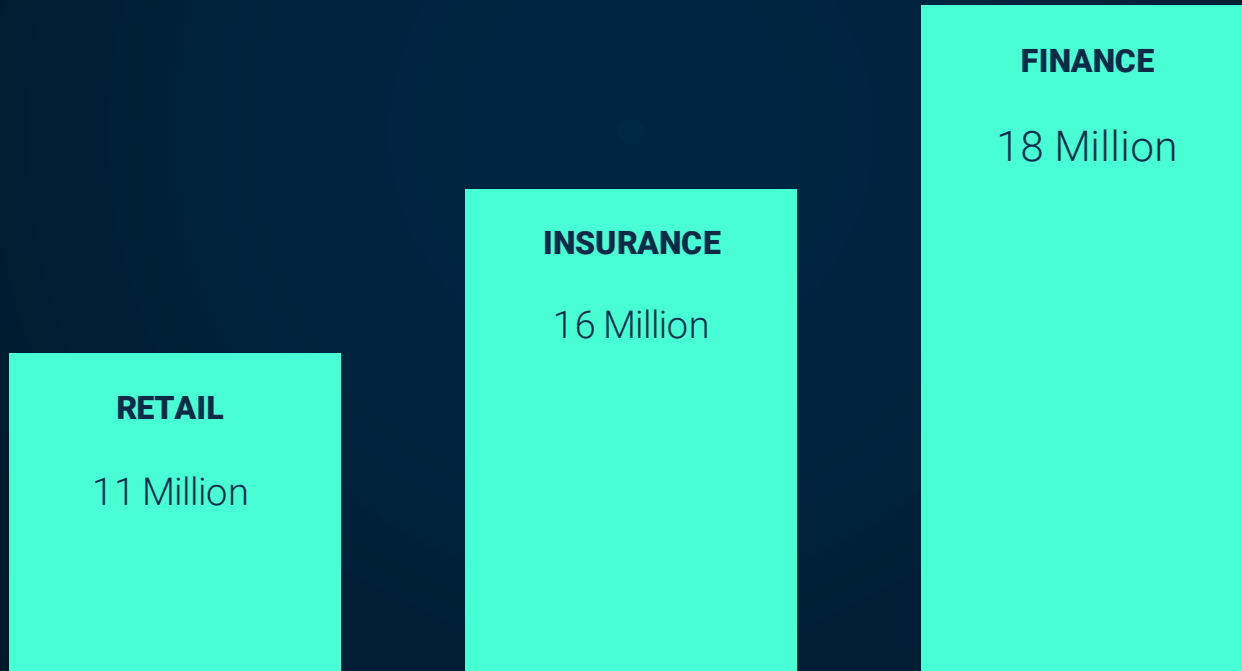

REMOTE WORK

Working remotely introduces more possibilities of insider threat

MARKET ANALYSIS

Annual cost of cybersecurity by industry (2018)

Market size

UEBA market size was
890 million in 2019 and is
forecasted to increase to
1778 million by 2025

-Market Data Forecast

THE TECHNOLOGY

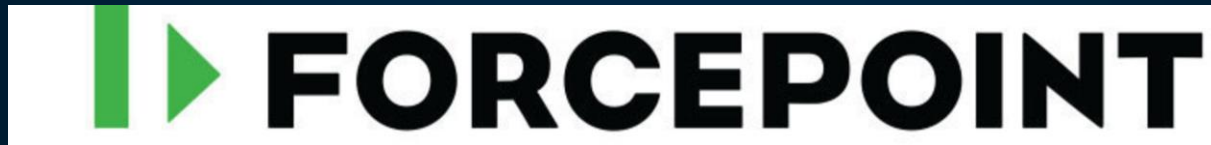

**Security Information and Event
Management**

**User (and Entity) Behavioral
Analytics**
